

\*\*\*\*HARTFORD ROAD SEWER FORCE MAIN\*\*\*\*

\*\*\*\*REPLACEMENT UPDATE\*\*\*\*

The replacement of sanitary sewer piping on Hartford Rd has begun resulting in a full closure on Hartford Rd. from Route 38 to Union Mill Road thru Jan. 2018.

This section of sanitary sewer piping carries approximately 3 million gallons of wastewater per day. Due to the impact this project has and will have on our system, it has become necessary to hire outside haulers to move sewage from one side of town to the other. You may see this intermittently throughout the term of the project, which has an anticipated completion of January 2018.
