

Construction of upgrades and improvements to the Library Pump Station Force Main and Millstream Pump Station Force Main Connection in the Township of Mount Laurel NJ at a cost of \$1,219,000.83 were financed by the New Jersey Water Bank (NJWB). The NJWB is a State Revolving Fund program jointly administered by the New Jersey Department of Environmental Protection (DEP) and the New Jersey Infrastructure Bank (NJIB) and uses a combination of funds provided by the United States Environmental Protection Agency, the DEP, and the NJIB to provide very low interest loans to borrowers for environmental infrastructure projects.

This project will provide water quality benefits by replacing aging portions of the sanitary sewer collection system that are susceptible to failure, resulting in discharge of untreated sewerage for residents and businesses in Mount Laurel Township.

State Revolving Fund programs around the nation provide states and communities the resources necessary to maintain and improve the infrastructure protecting our valuable water resources nationwide.
