

Upgrades and improvements to the Hartford Road Water Pollution Control Facility Dewatering Building in the Township of Mount Laurel NJ at a cost of \$3,675,000.00 financed by the New Jersey Water Bank (NJWB). The NJWB is a State Revolving Fund program jointly administered by the New Jersey Department of Environmental Protection (DEP) and the New Jersey Infrastructure Bank (NJIB) and uses a combination of funds provided by the United States Environmental Protection Agency, the DEP, and the NJIB to provide very low interest loans to borrowers for environmental infrastructure projects.

This project will allow the Authority to remove additional liquid from the sludge, thereby reducing the disposal cost; hence reducing the cost of operating the wastewater treatment plant, which will benefit the residents and businesses in Mount Laurel Township.

State Revolving Fund programs around the nation provide states and communities the resources necessary to maintain and improve the infrastructure protecting our valuable water resources nationwide.
