

The replacement of the Mount Laurel Township Municipal Utility Authority's Water Treatment Plant HVAC System, Mount Laurel Township, NJ was financed by the New Jersey Water Bank (NJWB) in the amount of \$1,381,950. The NJWB is a State Revolving Fund program jointly administered by the New Jersey Department of Environmental Protection (DEP) and the New Jersey Infrastructure Bank (NJIB) and uses a combination of funds provided by the United States Environmental Protection Agency, the DEP, and the NJIB to provide very low interest loans to borrowers for environmental infrastructure projects.

This project will provide benefits by allowing the Authority's personnel to operate, monitor and maintain the equipment without drastic fluctuations in temperature and humidity.

State Revolving Fund programs around the nation provide states and communities the resources necessary to maintain and improve the infrastructure protecting our valuable water resources nationwide.
